

Information on the webinars about the device of development of concentrations “PRK - 1U”

After each webinar, conducted by Grigori Grabovoi from 25 to 30 January 2016, he will provide information on successful tests of the device of development of concentrations “PRK - 1U”.

The listeners will learn about the development of concentrations, which provide eternal life, with the help of the device according to the following controls:

Control 1:

Development of concentrations of eternal life for any event.

Control 2:

Development of concentrations of eternal life for controlling clairvoyance.

Control 3:

Development of concentrations of eternal life for controlling forecasting.

While controlling for controlling forecasting a goal should be set to develop, with the help of the device, consciousness and spirit so that in the long term you will be able to use only the developed spirit and consciousness without the device.

Control 4:

Development of concentrations of eternal life for rejuvenation.

Description of the device:

Development of concentrations providing eternal life to all is carried out by concentration of attention on the receiver of generated bio-signal and control of the result of the concentrations. It is known from psychology that the longer the concentration is carried out, the faster the target is achieved, and the events are optimized. The device, in addition to this factor of psychology according to the law of universal connections, has a control of the goal of concentration through superposition of the fields from generation of the bio-signal, electromagnetic fields. The device develops concentrations of creative control.

The device is based on the two currently effective patented inventions of Grigori Grabovoi “Method of prevention of catastrophes and device for its realization” and “Information carrying system”.

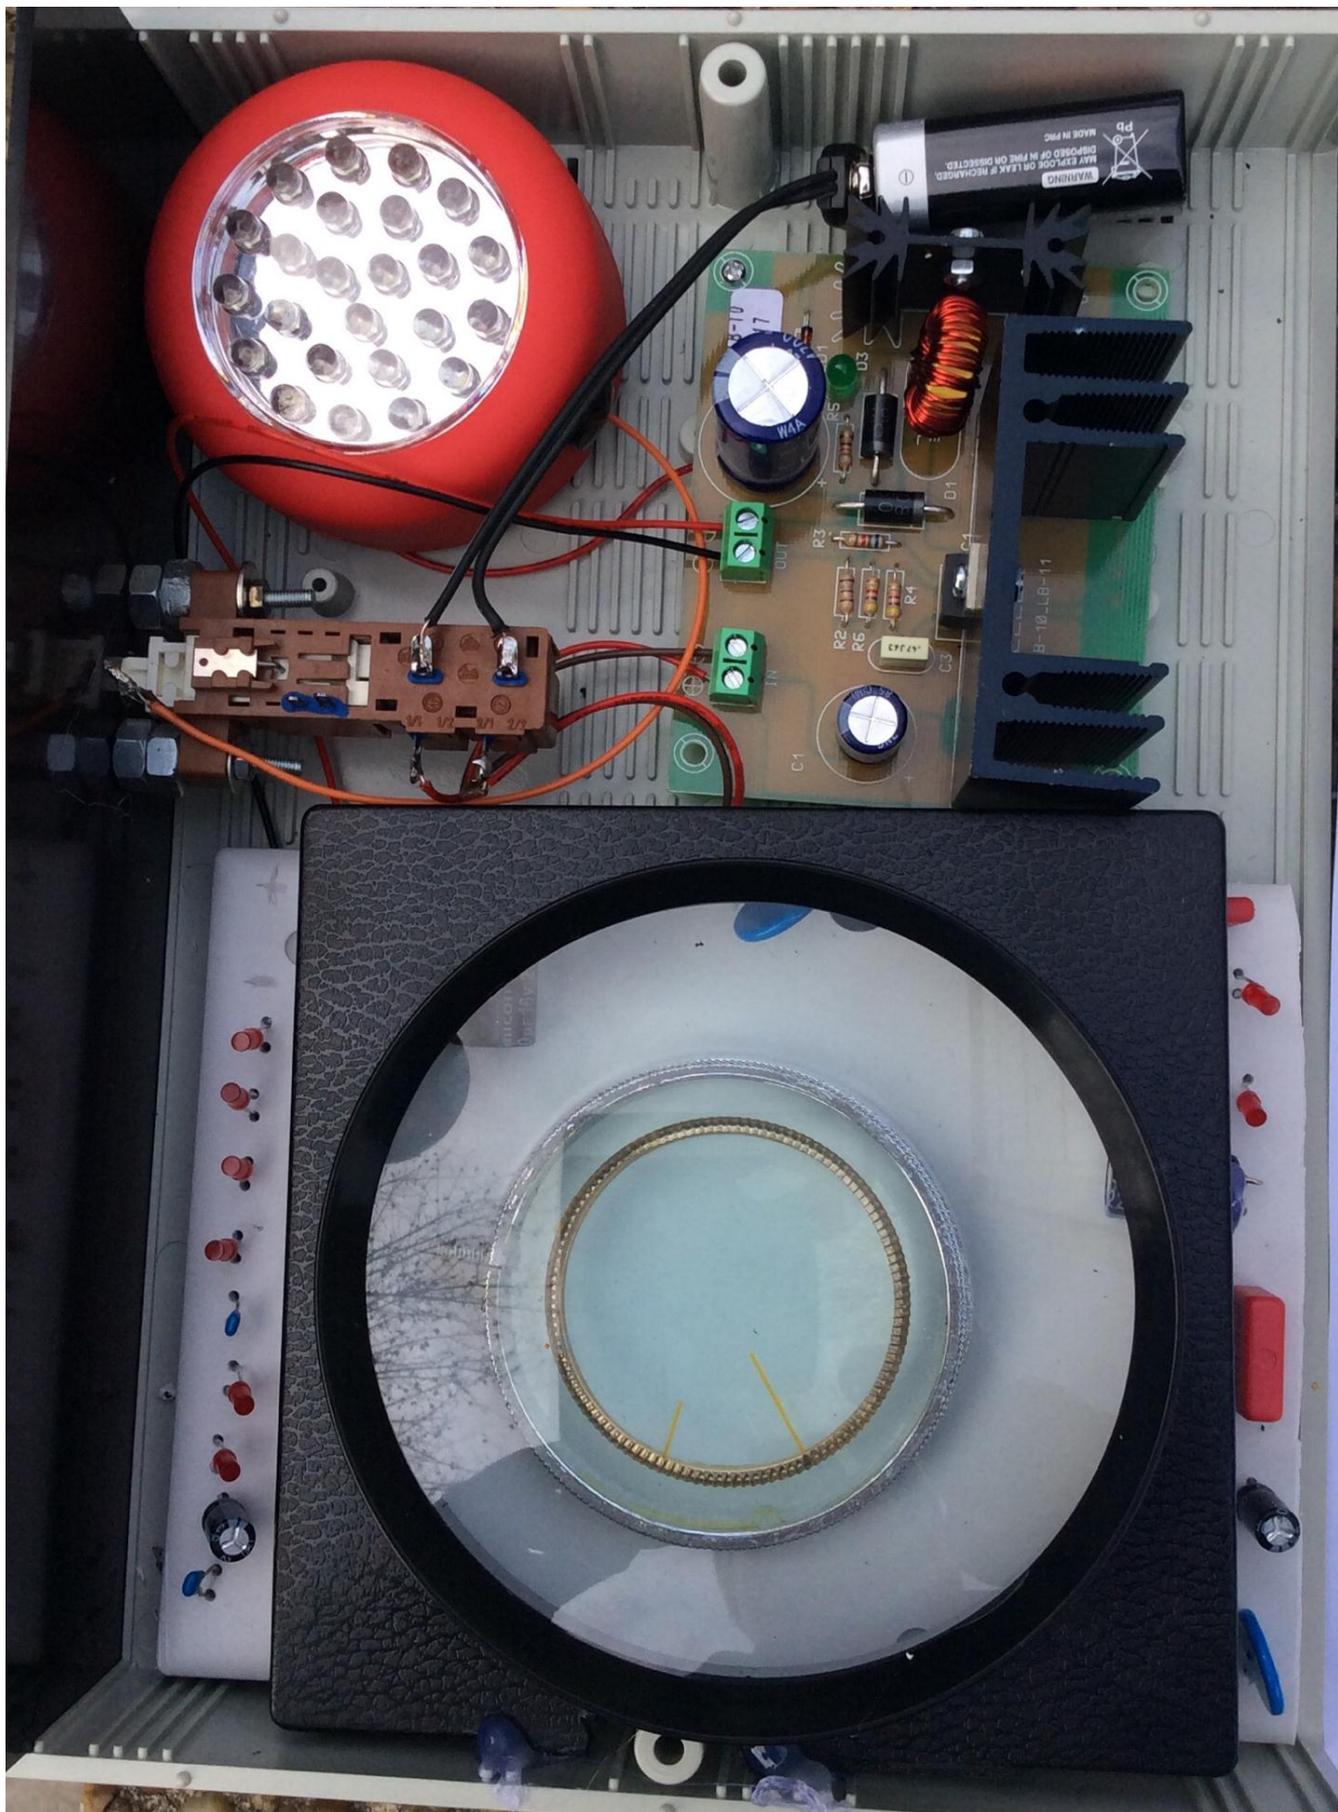

The patent “Information carrying system” has the following information: it is known in the theory of wave synthesis that a thought generated into radiation may be simultaneously of two quantum states. One of these states is located on the sensor element of the transmitter of the signals and another is at the receiver of the signals. This makes it possible to create devices for ensuring eternal life, which interact with thinking. The patents for the inventions of Grigori Grabovoi say that a human operator generates information in the form of radiation of thought. For work of the device “PRK - 1U” a person concentrates radiation produced by the thought on the lenses located on the upper surface of the device:

The thought includes the goal of concentration. The action of concentration for the current and future time is made on the sensor element of the transmitter of signals consisting of lenses. Circular movements of concentrations of smaller diameter of the lenses are carried out counter-clockwise through the lenses of greater diameter.

At concentrations related to the events of the past, the circular motion of the thought of concentration was performed clockwise from the smaller lens to the larger lens. And the ray of concentration in this case was not on the top, as in the case of concentrations for the current and future time, but from the inner optical assembly of the device.

In accordance with the system of transmission of information described in the patent, another quantum state of thought is projected onto the receiver of signals arranged in the form of optical device inside the device:

Realization of the method of normalization, during the concentration described in the patent “Method of prevention of catastrophes and device for its realization” is carried out through superposition of the fields from generation of the bio-signal, electromagnetic fields. In addition to the factor of psychology according to the law of action of universal connections, a control of the goal of concentration is added.

The device universally works for the development of the following concentrations to ensure eternal life:

Control 1:

Development of concentrations of eternal life for any event.

Control 2:

Development of concentrations of eternal life for controlling clairvoyance

Control 3:

Development of concentrations of eternal life for controlling forecasting.

While controlling for controlling forecasting a goal should be set to develop, with the help of the device, consciousness and spirit so that in the long term you will be able to use only the developed spirit and consciousness without the device.

Control 4:

Development of concentrations of eternal life for rejuvenation.

The inventor of the device "PRK – 1U" is Grigori Petrovich Grabovoi

The producer of the device is

Individual entrepreneur "GRIGORII GRABOVOI PR KONSALTING TECHNOLOGIES OF ETERNAL DEVELOPMENT" operates on the basis of the certificate of state registration of individual Grigori Petrovich Grabovoi as an individual entrepreneur №63983276 issued on. September 21, 2015 by the Agency for the registration of enterprises of the Republic of Serbia.

The methods of use of the device:

Methods of use were the following: concentration on the goal of control 1, 2, 3, 4 is carried out within the time interval from 1 to 3 minutes, and if necessary longer, without the turned on device and when the device is turned on. The results are compared in terms of development effect concentrations ensuring eternal life. This effect is used for the development of concentrations on specified directions through repeated use.

The results of the use of the appliance:

Control 1:

Development of concentrations of eternal life for any event.

Comparison of concentration before switching on the device and concentration during operation of the device established that a support at the concentration occurs, there is a feeling of energy flow, spiritual and creative capabilities increase.

Control 2:

Development of concentrations of eternal life for controlling clairvoyance

Comparison of concentration before switching on the device and concentration during operation of the device established that during operation of the device the flat images perceived by the controlling clairvoyance from become voluminous, more stable and clear, controllability increases, the increase of the image through magnifying glass effect occurs.

Control 3:

Development of concentrations of eternal life for controlling forecasting.

Comparison of concentration before switching on the device and concentration during operation of the device established that during operation of the device the information of the controlling forecasting becomes controllable more harmoniously based on the form similar to damp dynamic matter, the capability of developing controlling concentrations on more distant into the future events increases.

Control 4:

Development of concentrations of eternal life for rejuvenation.

Comparison of concentration before switching on the device and concentration during operation of the device established that during operation of the device concentration on rejuvenation is strengthened, energy potential increases, and a person may feel a state of an earlier age.

The device meets the demanding standards. We accept orders for purchase of the device of development of concentrations "PRK-1U". Before purchasing the device we accepted the information to customize your device. When you purchase the device purchaser the device is used in the sales office, because the device refers to complex technical devices responsive to individual radiation of thoughts.

If there is the necessary result of the use by the buyer, the device is sold to the buyer. The price of the device will soon be calculated and information will be sent on request.
